pryseflow

Vertical Spacing

A clean rhythm of whitespace is just as important as colour or type. At Pryseflow we follow an 8-pixel baseline grid that scales upward in easy multiples—8, 16, 24, 32... all the way to 96 px. These "spacers" act like musical rests, ensuring every element has the breathing room it deserves and that pages feel balanced from mobile screens to 4-K monitors.
